Step 2

Remove Wheels from your Log Splitter. Save these parts you will need them to reinstall on Stand Wheel Base.

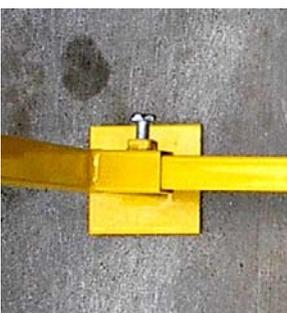

Step 3

Install Wheels to Wheel Base. Check to be sure they are Secure.

Step 4

Connect Base and Adjusting Rail to Wheel Base. Tighten Bolt on Base.

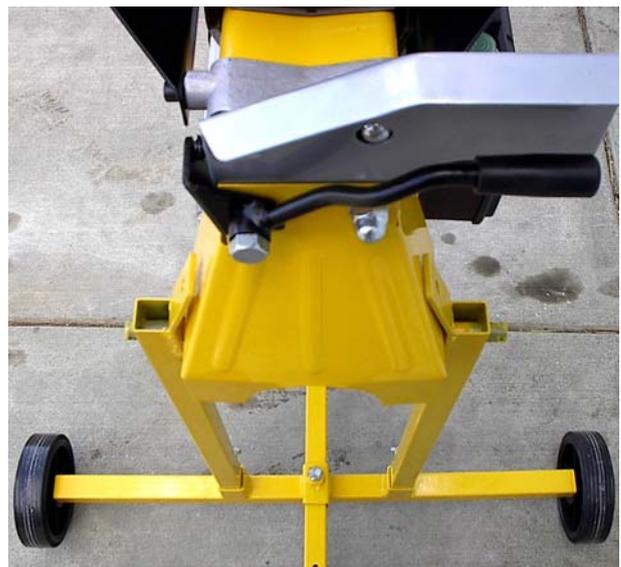

Step 5

Connect 1 Upright to Wheel Base, Tighten Bolt for 1st Upright.

Step 6

With the Help of Another person, Install Log Splitter on Stand, allowing front Leg Support frame to sit on base while attaching last Upright to Wheel Stand. Tighten Bolt on Second Upright. Install Bolts & Nuts on Front Support. Confirm Levelness of Splitter and Tighten Bolt on Adjustable Rail.

Verify All Bolts & Nuts are Tightened and you will be ready to operate your Log Splitter on Stand.
